Notes:

The valuations, which have been prepared in good faith by the Company, are based principally on formal valuations supplied to the Company by the administrators of the Company's underlying

investments. In the case of certain of the Company's investments, estimated valuations prepared by the administrators of the underlying funds have been utilised. Together with the formal valuations, the Company calculates the "Manager NAV" in the table above.

Furthermore, the board has agreed to take reserves against certain valuations of the Company's underlying investments (as previously disclosed). Such reserves are unaudited and may result in valuations which do not comply with generally accepted accounting or valuation principles. By applying these reserves to the "Manager NAV" the Company arrives at a figure for the "GFIR NAV".
